We are currently faced with radiation from the fallout from Fukushima event in Japan coming towards the west coast of the United States. This radiation has not been halted. We've noticed symptoms in plants and ourselves that seem unusual.....perhaps you have noticed some plants that have all of a sudden died or look unusually stressed. You may be noticing that you have usual "pimples" that don't go away quickly. This may be due to the radiation that has been come over from Japan.
